My task was to analyze our sales data and find out the reasons behind this drop (Task). I was tasked with doing an in-depth market analysis to inform the decision. I gathered and analysed a variety of data, including market size, growth rate, competition, and potential barriers to entry. My analysis showed that while the market was growing, there were already several well-established competitors and significant barriers to entry. I presented my findings to the senior leadership team, and they decided not to pursue the expansion based on my analysis. Instead, we focused our resources on growing our existing markets, which resulted in a 20% increase in revenue over the next quarter.
